

### **Short bio – Elisabetta Caon**

Elisabetta Caon received a Bachelor degree magna cum laude in Biotechnologies in 2015 at Università degli Studi di Padova, with a project on liver cholestasis. Afterwards, in 2017, she got a Master Degree magna cum laude in Industrial biotechnologies at Università degli Studi di Padova. For her master thesis work she joined Massimo Pinzani's group at UCL, London, and she focused on the investigation of hepatic stellate cells behaviour in a novel 3D model and on the effect of the peptide Adrenomedullin on stellate cells. Following the thesis project, two abstract were accepted as posters at EASL Paris 2018 and at AISF Rome 2018.
